MOB TO DIG THE SUBWAYS. But Italians Weren't Employed Because Blueprints Weren't Ready.

Announcements that the Bradley Contracting Company would start yesterday subway caused several thousand Italians to flock to Lexington avenue looking for work. As a result of the experience the contracting company asked yesterday that publicity be given to the fact that the Public Service Commission has no yet furnished the surveys to enable the company to begin work.

Mohair has got on in the world. It has always enjoyed an inside rather than an outside reputation. Merely a lining originally, and largely that now, it has latterly become favorably known as a suit fabric. It has come out of obscurity and superseded a host of Summer fabrics, and the wonder is that every man in town has not a mohair in his wardrobe.

The mohair suits in this sale are two-garment models, made of Priestley cravenetted mohairs, in the newest fabric designs, and according to Saks standards. Reduced to 13.00 for this sale, they are at once a bargain and a confutation of the fallacy that thirteen is unlucky.

It is but fair to state, however, that aside from the charge of idleness, these shirts admirably fulfil all those conditions which induced us to take them in. They are splendidly made, of fine domestic and imported madras and mercerized cloths, in plain colors and striped effects. Plain or pleated negligees, and soft bosom models with French cuffs.
